

Accelerate ERP Modernization  
DXC Advanced  
Services for Oracle  
Fusion Cloud

# Why DXC?

CXOs want to innovate faster, run simpler and show sustainable growth.

## The barriers to an intelligent, sustainable enterprise

Organizations today are dealing with fundamental challenges, including:

- Realizing new opportunities in rapidly changing markets
- Risking disruption to existing core operations

With the acceleration of digital transformation in all industries, many organizations are still facing barriers in their ability to innovate. These barriers include:

- Limitations to enabling continuous innovation
- Lack of best practices embedded into the core business strategy and operations
- Disparate and multiple vertical industry-specific processes running your value chain end to end
- A platform that is unable to keep pace with the speed of business
- Organizational silos hampering collaboration, productivity and the ability to leverage data to make informed business decisions
- Limitations on legacy system modernization due to limited resources, cumbersome processes and technical debt
- IT skills gap
- Integration complexity

We help you make the right investments, at the right time, on the right platforms.

## Embrace the intelligent enterprise evolution

Organizations are modernizing their legacy IT landscapes and beginning to harness the power of continuous evolution to achieve better outcomes.

### Digital leaders need to consider:

**End-to-end business processes**

**Continuous innovation**

**Service agility**

**Resilient infrastructure**

**Platform for innovation**

**Business process optimization**

**Cost reduction**

**Automation**

**Integration of systems**

**As-a-service nature of digital**

**AI-driven decision making**

**IT skills gap**

**Access to digital services**

**Sustainable technology**

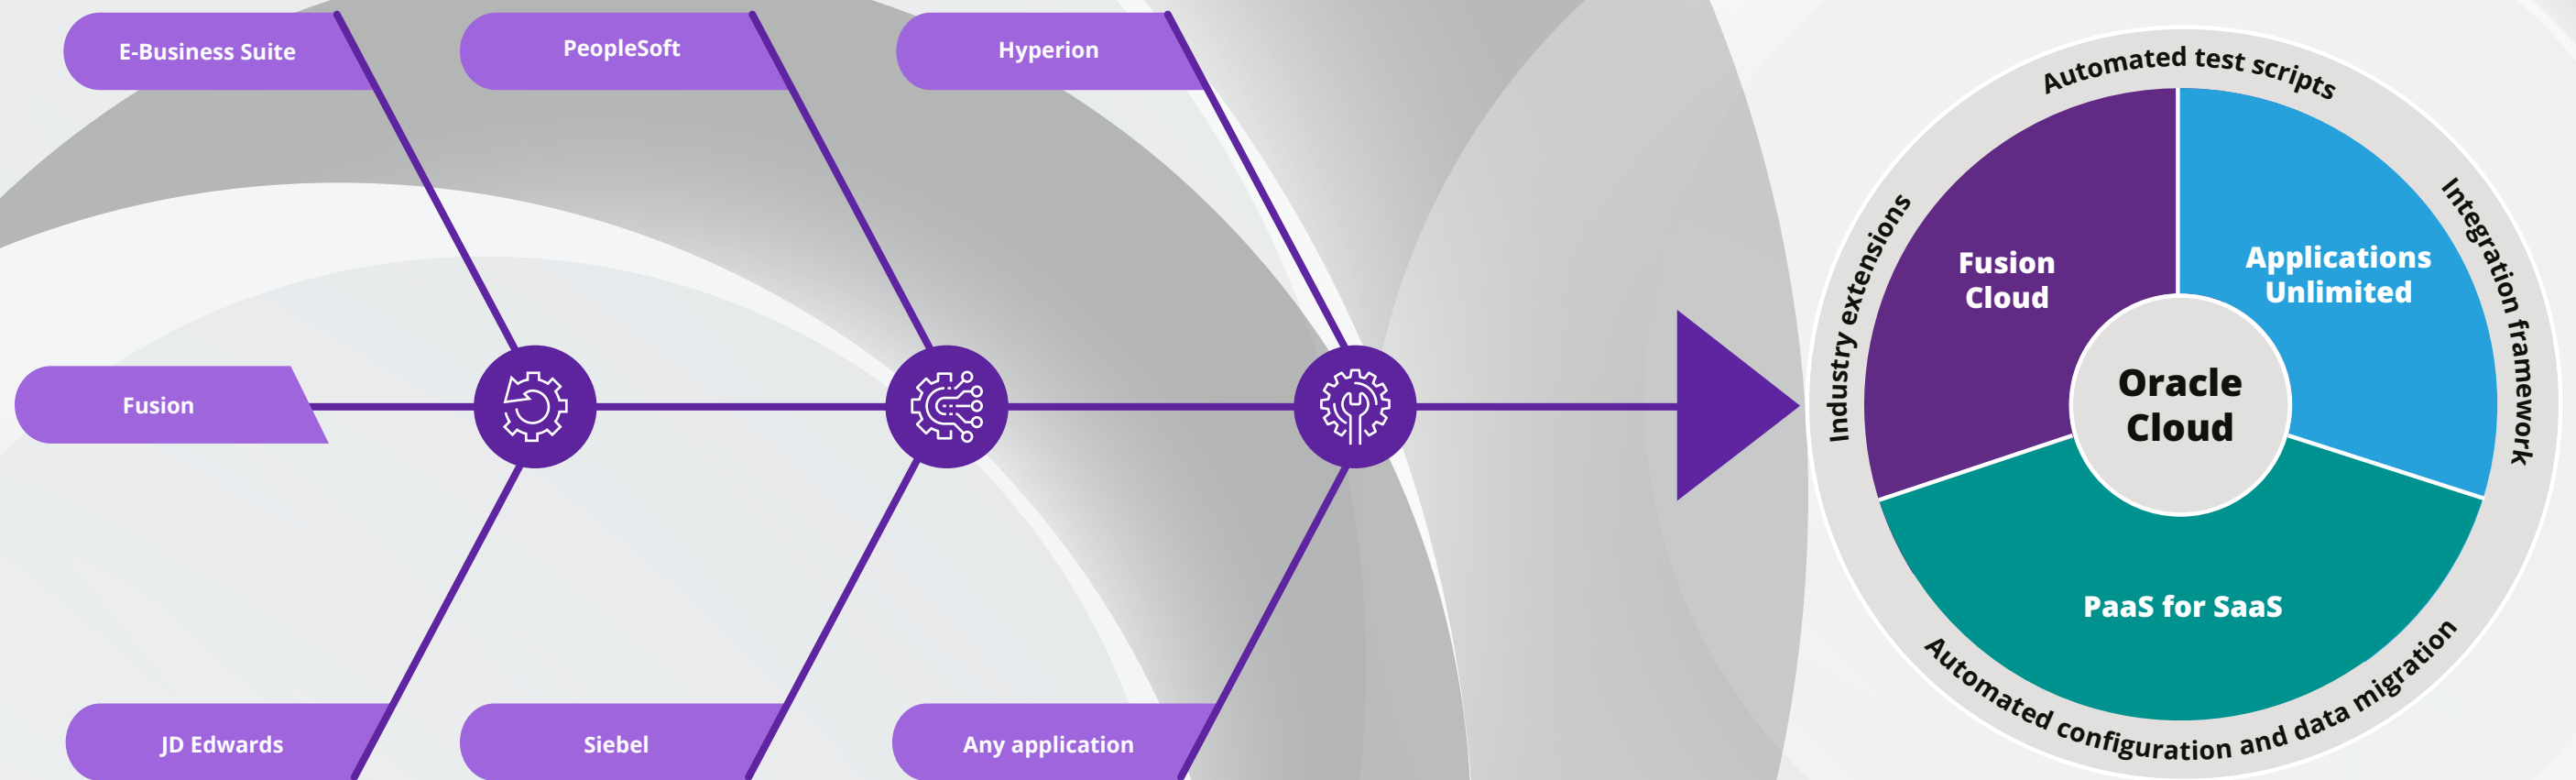

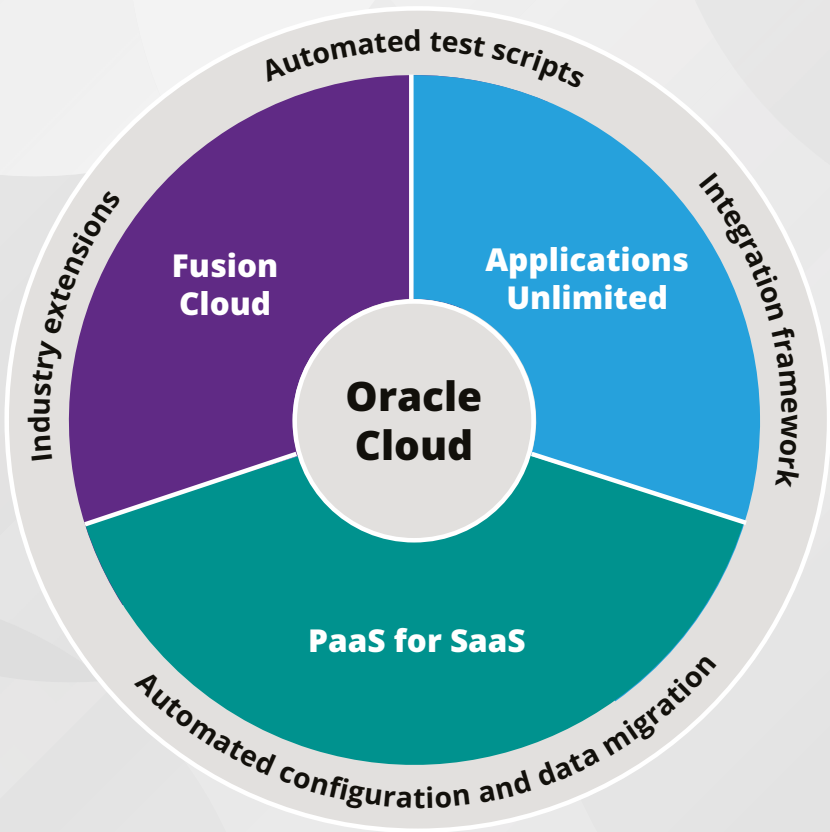

## A pathway to modernization

While a full transformation and modernization of legacy ERP may seem daunting, DXC Technology has a proven pathway no matter where you may currently be on your journey. Whether you are running Oracle's E-Business Suite, PeopleSoft, JD Edwards, Siebel,

custom applications or even have started with Fusion, we can provide you with a roadmap, deliverables and implementation services that enable continuous innovation and better business outcomes.

No matter where you currently are, DXC has a pathway for where you can be.

## DXC Advanced Services for Oracle Fusion Cloud

DXC Advanced Services for Oracle Fusion Cloud is designed to help businesses accelerate their digital transformation journeys with Oracle applications and drive business agility and outcomes.

DXC Advanced Services for Oracle Fusion Cloud offers customers an accelerated Oracle Fusion Cloud SaaS deployment, along with a clear pathway to develop new business models to ensure resilience, maintain agility, gain efficiencies to fund innovation, and transform mission-critical systems without business risk — all very simply.

DXC Advanced Services for Oracle Fusion Cloud features advisory, implementation, migration, integration, managed services and continuous improvement.

### Single customer governance and operating model.

As your single point of contact, DXC, a fully accredited global Oracle partner, is with you from contract onward. Simple and consistent.

### Get complete Oracle Cloud technical operations.

Extensions, interfaces, configuration migration between production and staging environments.

### Benefit from transformation.

Assess, accelerate and optimize relevant migration for business.

### Boost your business.

Clean cloud, side-by-side and multi-cloud integration connect processes and data across your application portfolio with Oracle Integration Cloud.

### Most advanced AMS services.

Oracle SaaS AMS/Operate capabilities, testing automation, process optimization.

### Enhance security.

Share critical procurement, logistics and asset information using standard integrations and starter packages.

# DXC's six key elements to help organizations move Oracle systems to the cloud

Simplicity, consistency and single accountability, along with complete technical operations to accelerate your business

# 1

## ADVISORY SERVICES

Our advisory services include the following key elements:

- Define business objective
- Assess current Oracle estate landscape
- Develop roadmap — leveraging process mining and analytics to drive decisions based on costs, benefits and overall timeline
- Determine deployment options
- Identify key benefits
- Risk mitigation
- Change management

# 2

## IMPLEMENTATION SERVICES

DXC provides a comprehensive range of implementation services leveraging best practices and industry extensions to optimize and simplify end-to-end processes, including:

- Project management
- System design
- Configuration
- Testing
- Deployment

# 3

## MIGRATION SERVICES

DXC helps customers migrate their Oracle application landscape to Oracle Cloud with minimal disruption to their business leveraging automation and health checks to lower risk and time to value.

Our migration services cover all aspects, including:

- Data migration
- Application migration
- Testing
- Decommissioning

# 4

## INTEGRATION SERVICES

DXC helps customers integrate their Oracle landscape across non-Oracle applications and systems.

Our integration services include design, development, testing and deployment leveraging Oracle Integration, which also allows you to optimize your IP.

DXC's integration framework for Oracle Integration Cloud accelerates and de-risks your implementation.

# 5

## MANAGED SERVICES

DXC offers a range of managed services to help customers optimize and enhance the value of their Oracle Fusion Cloud solution.

These value stream-focused services include:

- Cloud operations monitoring
- Service management (ITIL)
- Security management and application support
- Quarterly upgrade process and integration testing support

# 6

## CONTINUOUS IMPROVEMENT

DXC helps customers optimize their Oracle Fusion Cloud solution by identifying areas for improvement — such as reducing costs, increasing efficiency and improving user experience.

DXC has a range of continuous innovation services that extend beyond Oracle Fusion Cloud quarterly upgrades to include process improvement, automation, process standardizations, application and extension development, and business advisory.

# Simplifying the way forward with DXC's pioneering approach

By treating the platform as a product to drive close alignment between platform output and business value, DXC Technology can help you build in continuous evolution.

## About DXC Advanced Services for Oracle Fusion Cloud

### We build, deliver and support

DXC Advanced Services for Oracle Fusion Cloud is designed to help organizations of all sizes and industries accelerate their digital transformation journeys. By adopting Oracle Fusion Cloud, organizations can benefit from a modern, flexible, integrated and scalable Oracle Fusion Cloud SaaS that enables the ability to respond quickly to changing market conditions, reduce costs and improve customer experience.

Deep expertise in Oracle Fusion, combined with a proven track record in cloud migration, application integration and managed services, makes DXC the ideal partner for organizations looking to move to Oracle Fusion Cloud.

DXC has the ability to deliver complex Oracle application modernization globally at a low price point thanks in part to our investment in the MSP Aggregate Buy program. Our unique commercial and deployment options include Oracle Financing, buy on behalf, resell, everything as a service, and DXC Managed Services.

For more than 35 years, DXC has provided a full spectrum of Oracle-based solutions to help customers worldwide extend their ability to quickly respond to market dynamics, simplify operations, and minimize the disruption, risks and costs of enterprise evolution.

But don't just ask us. Ask the many organizations with whom we have long-standing partnerships.

Read what our **customers** have to say.
