

DXC Assure P&C Policy

Meet complex policy administration needs with an easy-to-configure, scalable policy system for multiple commercial and personal lines of business

DXC Technology combines insurance expertise with microservices-based architecture policy administration software that supports multiple lines of business to help reduce process debt, enhance operational efficiency and improve customer satisfaction.

The challenge: Inefficient systems hinder customer service

The insurance industry is experiencing increasing pressure to provide better policy system configurability and user experience in order to better serve customers. Rapidly changing technology, regulatory changes and competitive pressures impede customer satisfaction, growth and profitability.

To remain competitive and offer exceptional customer service, insurers need a solution that empowers them to leverage the latest technology to manage all core policy functions, from underwriting to renewal

DXC Assure P&C Policy: A modern workflow solution

DXC Assure P&C Policy is an easy-to-configure, microservices-based policy administration software application with the industry's most comprehensive insurance processing functions for all lines of business. It supports multiple lines of business, including personal, commercial, workers' compensation, specialty and niche.

Assure P&C Policy supports the full policy life cycle, including policy administration, new business and underwriting.

DXC Assure P&C Policy features
